

UNIGIS

International Association

What is UNIGIS??

- The **UNIGIS International Association** is the world's premier distance education initiative offering masters and diploma programs in **Geographical Information Science and Systems (GISc)**. As a global network of higher education institutions UNIGIS is dedicated to enhance the competence of GIS professionals.

GIScience through flexible program and distance learning

- UNIGIS is a worldwide network of universities cooperating since 1990 in the design and delivery of distance learning in **Geographical Information Systems and Science**. The UNIGIS network offers **Postgraduate Certificate, Diploma and Masters courses**. Core course resources are adapted and supplemented with additional materials to support the needs of local students.

UNIGIS is about Quality Lifelong Learning in GIS...

- UNIGIS cooperates with a prestigious network of Technology Partners and Institutions to achieve high academic standards and application-oriented skills within an up-to-date working environment.

UNIGIS is about GIScience Degree Programs and Professional Development...

- Members of the UNIGIS network also work together in research and curriculum development activities related to GIS education. Our courses are in continuous development and are currently offered in English, German, Hungarian, Portuguese and Spanish.
- UNIGIS is the largest and best-established eLearning GIS program in the World. Each year we enroll more than 400 students world-wide. We have over 4.000 UNIGIS alumni in more than 40 countries.

UNIGIS is the global, virtual & multilingual network for GIScience!

- International distance learning programs since 1993
- Advanced online platform for flexible learning
- Modular course structures with elective and summer schools
- Flexible schedules, intensive tutoring
- Internationally recognized qualification in GIS

UNIGIS Qualifications by Distance Learning

- An MSc degree is an internationally recognised postgraduate academic qualification. UNIGIS partner universities are able to offer the opportunity to graduate with an MSc in GIScience or to be certified with a Professional Diploma.

MSc Degrees

- Master of Science (Geographic Information Science and Systems)
2+ year postgraduate study programme in GIScience for working professionals who want to become qualified as project, team or department leaders.
Students will build profound knowledge of concepts of GIScience and applications at a postgraduate level.

Professional Diploma / Certificates

- Professional Diploma / Certificate in GIS
1+ year certificate program for working professionals who need to efficiently and effectively acquire broad competences in methods and tools of GIS.
Participants advance their professional development in application-oriented skills and develop a basic conceptual understanding of GIScience.

Academic Excellence Prize

- The annual UNIGIS International Academic Excellence Prize is awarded to students having submitted the best MSc theses during the previous academic year, accepted for graduation at one of the UNIGIS partner universities worldwide.

Technology Partners

Where to meet UNIGIS

- [Geospatial World Forum](#), Geneve, May 5-9.
- [Geosummit](#), Bern, June 3-5.
- [AGIT & GI Forum 2014](#) - Symposium and Exhibit, Salzburg, July 1-4.
- [ESRI UC](#), San Diego, July 14-18.
- [UNIGIS Tag Schweiz 2014](#), Rapperswil, September 19.
- [GIScience](#) , Vienna, September 23-26.
- [Intergeo](#), Berlin, October 7-9.
