

# Airbus DS Intelligence újdonságok

GISOpen 2017 konferencia, Székesfehérvár

Domokos György  
Airbus DS Geo Hungary Kft.

DEFENCE AND SPACE

**AIRBUS**

# Intelligence positioning

1800

## Employees

21 offices in 12 countries,  
Intelligence serves  
customers in more than 100  
countries

## Multiple Sources

7 Earth Observation satellites, 2 radar  
and 5 optical, alongside expertise to  
access different types of information  
sources

## Strong Portfolio

Solutions that combine:  
Imagery, Services, Systems,  
Support - underpinned by  
innovation

We  
**DEFINE, COLLECT  
ANALYSE & INFORM**  
*so that  
our Customers  
can make*  
**ACCURATE DECISIONS**

## AIRBUS effect

Corporate investment in people and  
research, complemented by access to a  
larger portfolio: Aircraft, Satellites,  
Helicopters, UAV's

## Data to Information

Processing & Analytics tools and  
systems to produce relevant and  
timely information across  
Intelligence mission scope

## Customer Reach

Tri-Market Customer base  
across multiple market sectors  
facilitating cross learning and  
synergies

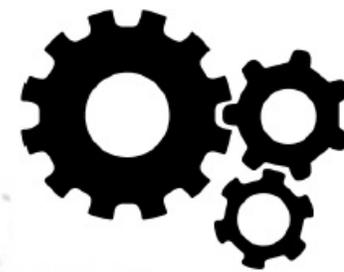

# Termékek és szolgáltatások (www.intelligence-airbusds.com/en)

# Új, javított minőségű képi termékek Pléiades és SPOT 6/7 felvételekhez

# Projected

The image acquired in the plan of the sensor is projected on a cartographic or geographic terrestrial plan.

The plan is defined with a constant altitude, which is the mean height value of the area of interest.

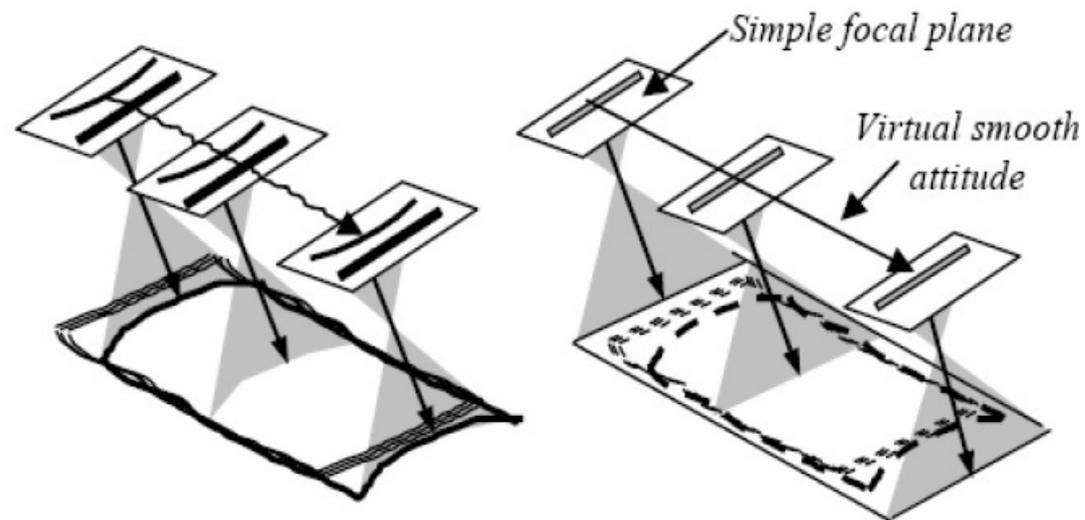

The Projected image has the same geometric quality than Primary.

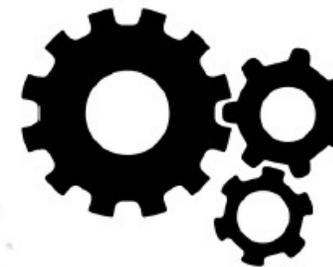

Projected option is compatible with any Spectral Combination or Radiometric Processing.

## Main benefits for users:

Directly compatible with GIS environment

Allow easier Orthorectification by users who use their own reference layers (Ortho, GCPs and DEM...) thanks to geometric model described in RPC file embedded

# Processing options

Geometric Processing

Primary  
Projected  
Ortho|

Radiometric Processing

Basic  
**Reflectance**  
Display

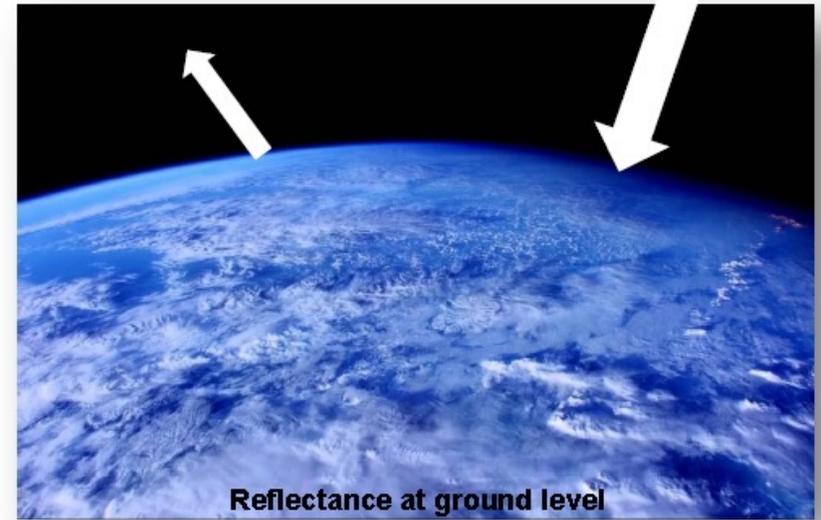

# Reflectance

Image radiometrically corrected from sensor calibration and systematic effects of the atmosphere (molecular or 'Rayleigh' diffusion)

Image values are provided in normalized reflectance values.

## Main benefits for users:

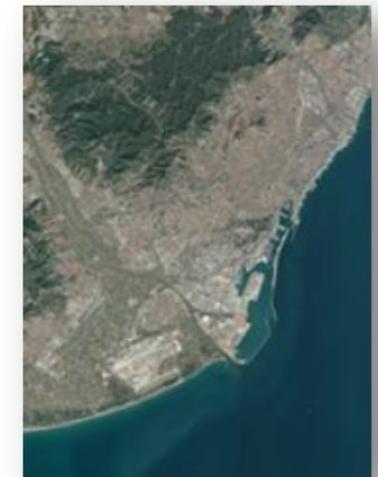

- Correct the bluish effects from atmosphere
- Get reliable true colors
- Ensure better stability of luminosity/contrast on screen
- Prepare direct near seamless coverages (eg. Mosaicking...)

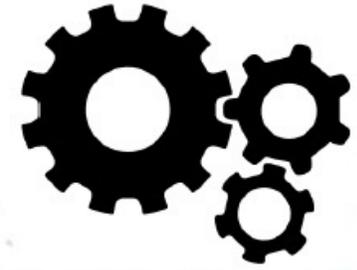

except where cloud, cloud veil, haze, aerosol (pollution, sand wind)...

# Display

## Definition

Display level products are generated based on a new algorithm based on the Reflectance product.

**Display** is the new version of the OVR processing.

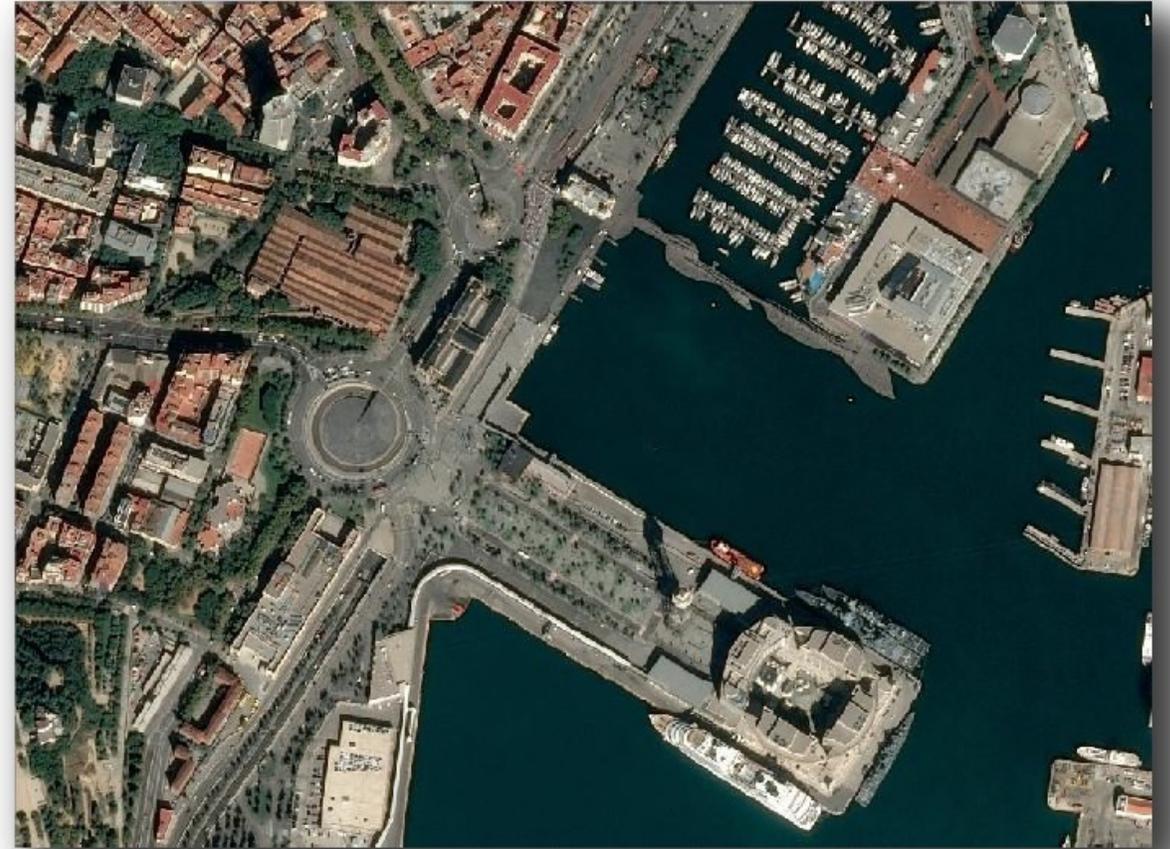

## Main benefits for users

Display processing is to be used when imagery needs to be immediately usable with optimized visual rendering.

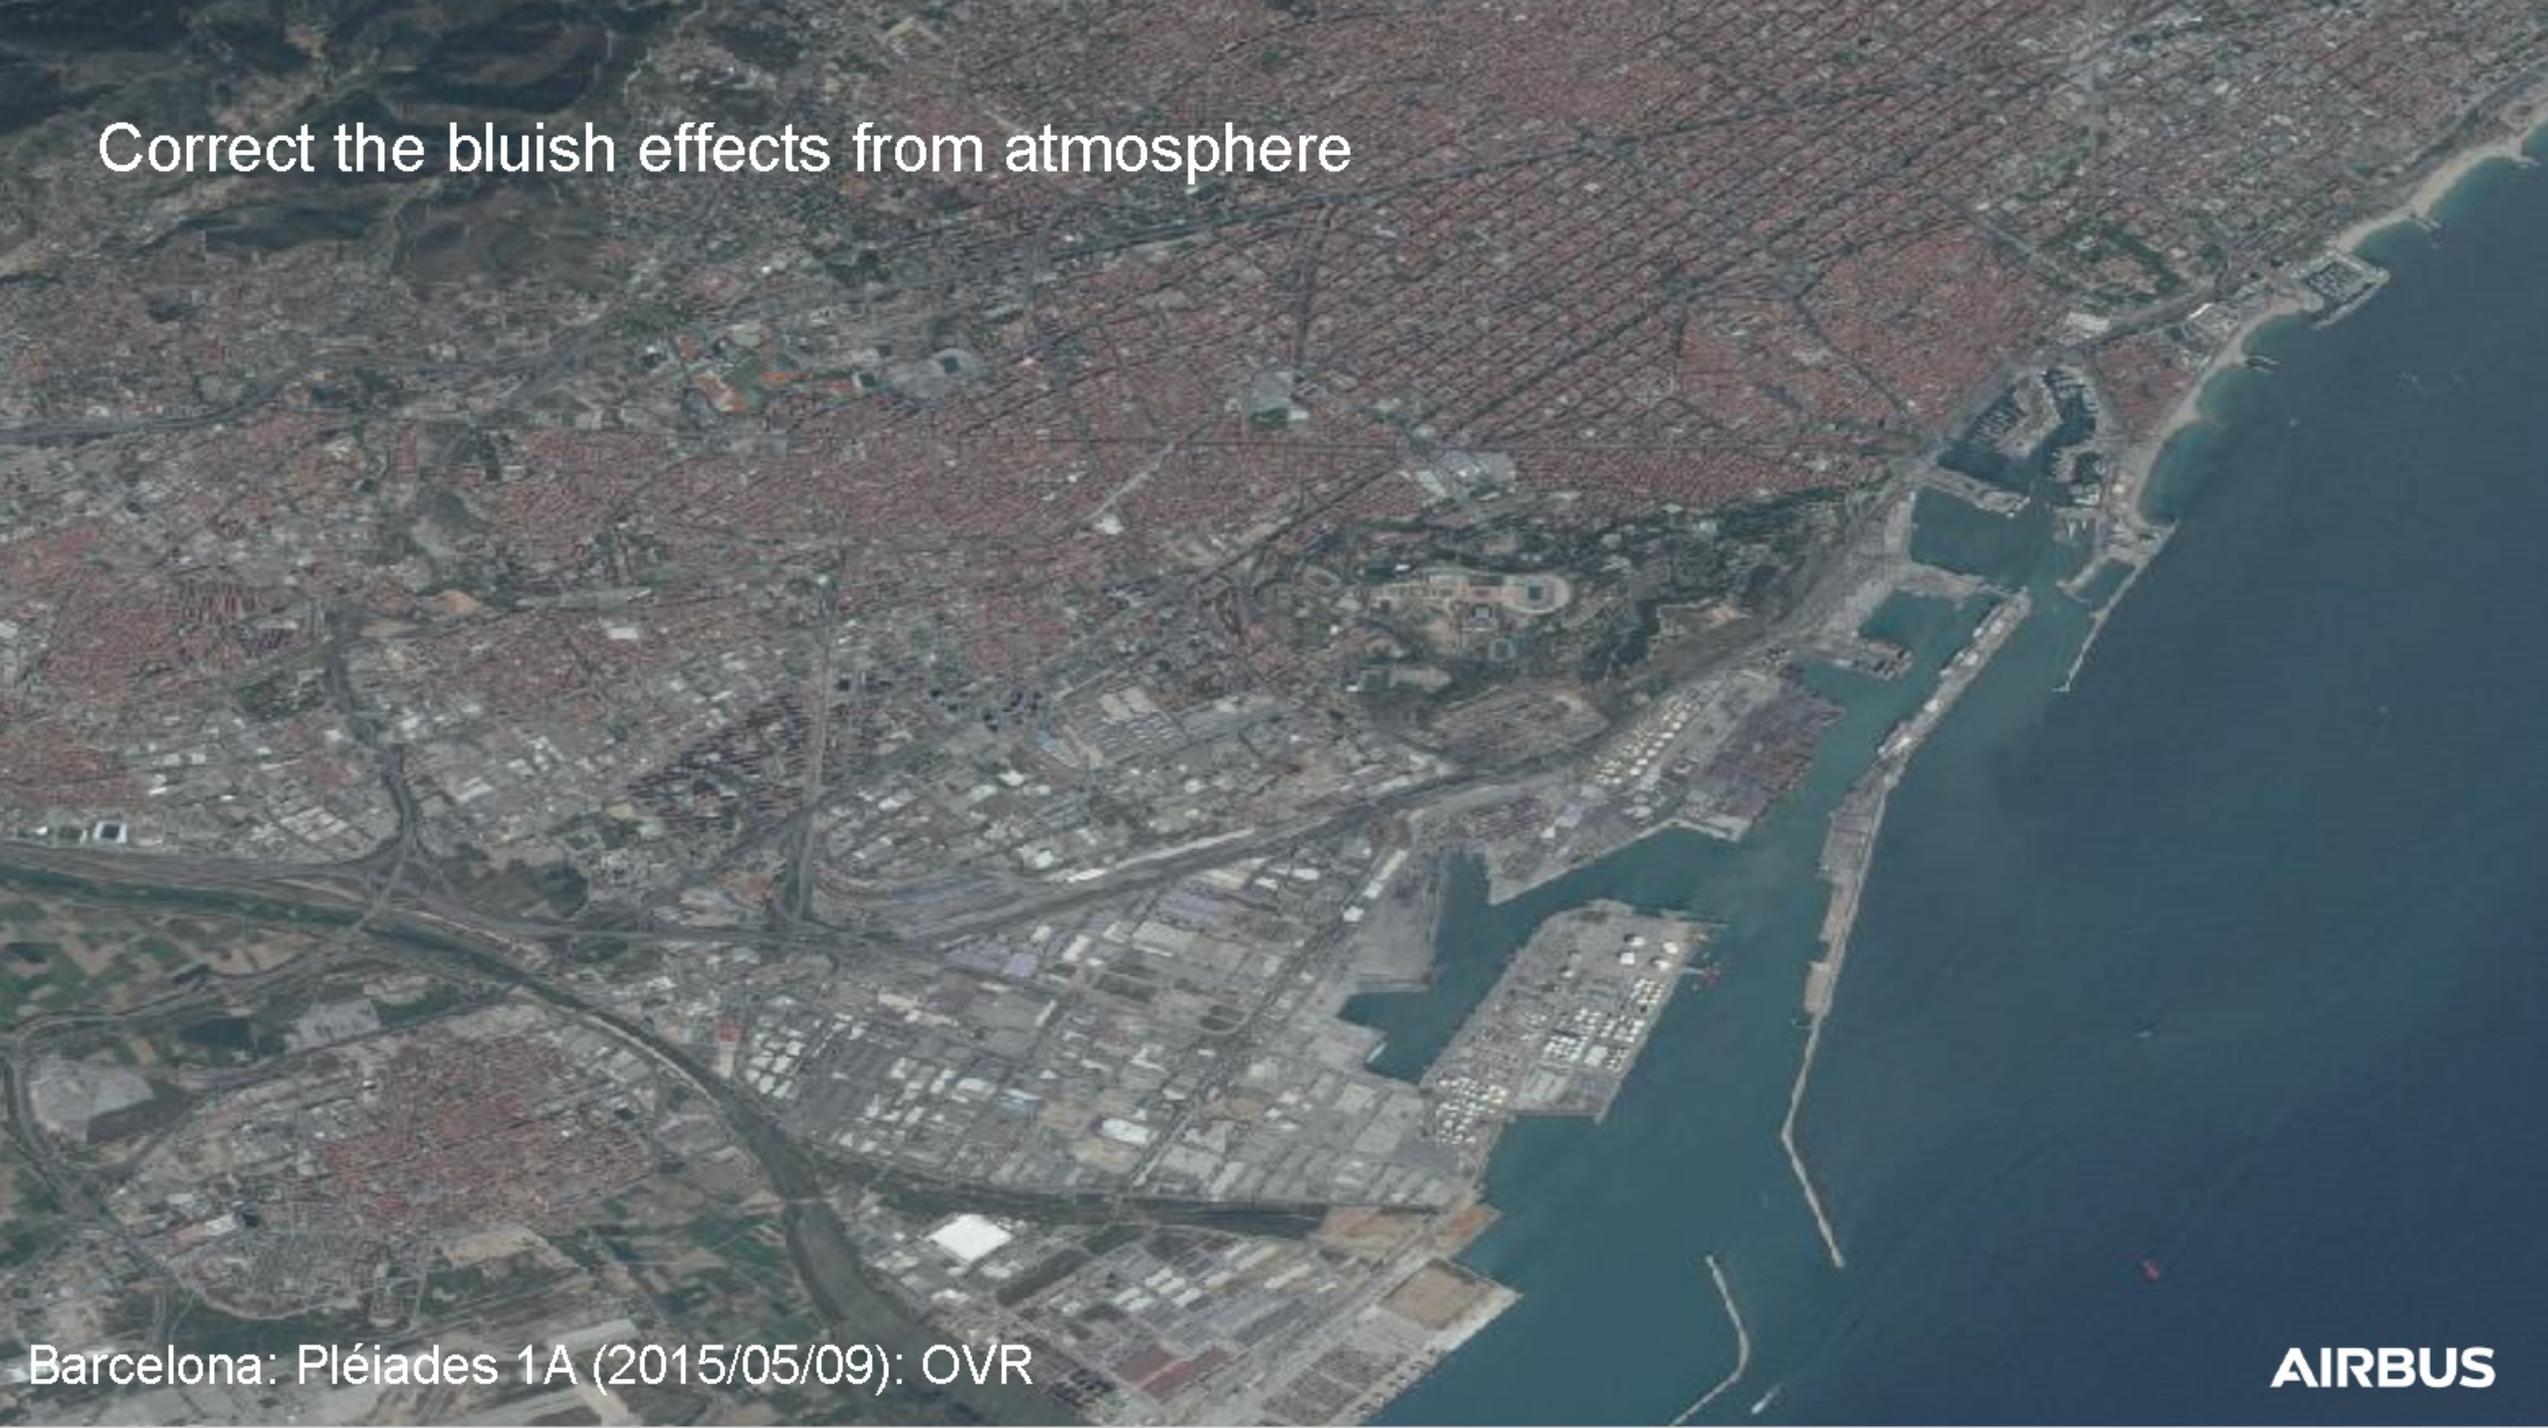

Optimized for display on screens (8bits)

**8-bit** pixel coding should be used.  
Technical information will be shared to users of the OVR option.

Correct the bluish effects from atmosphere

Barcelona: Pléiades 1A (2015/05/09): OVR

**AIRBUS**

Correct the bluish effects from atmosphere

SPOT Archive: 30° angle, 15% cc

\* Polar areas excluded

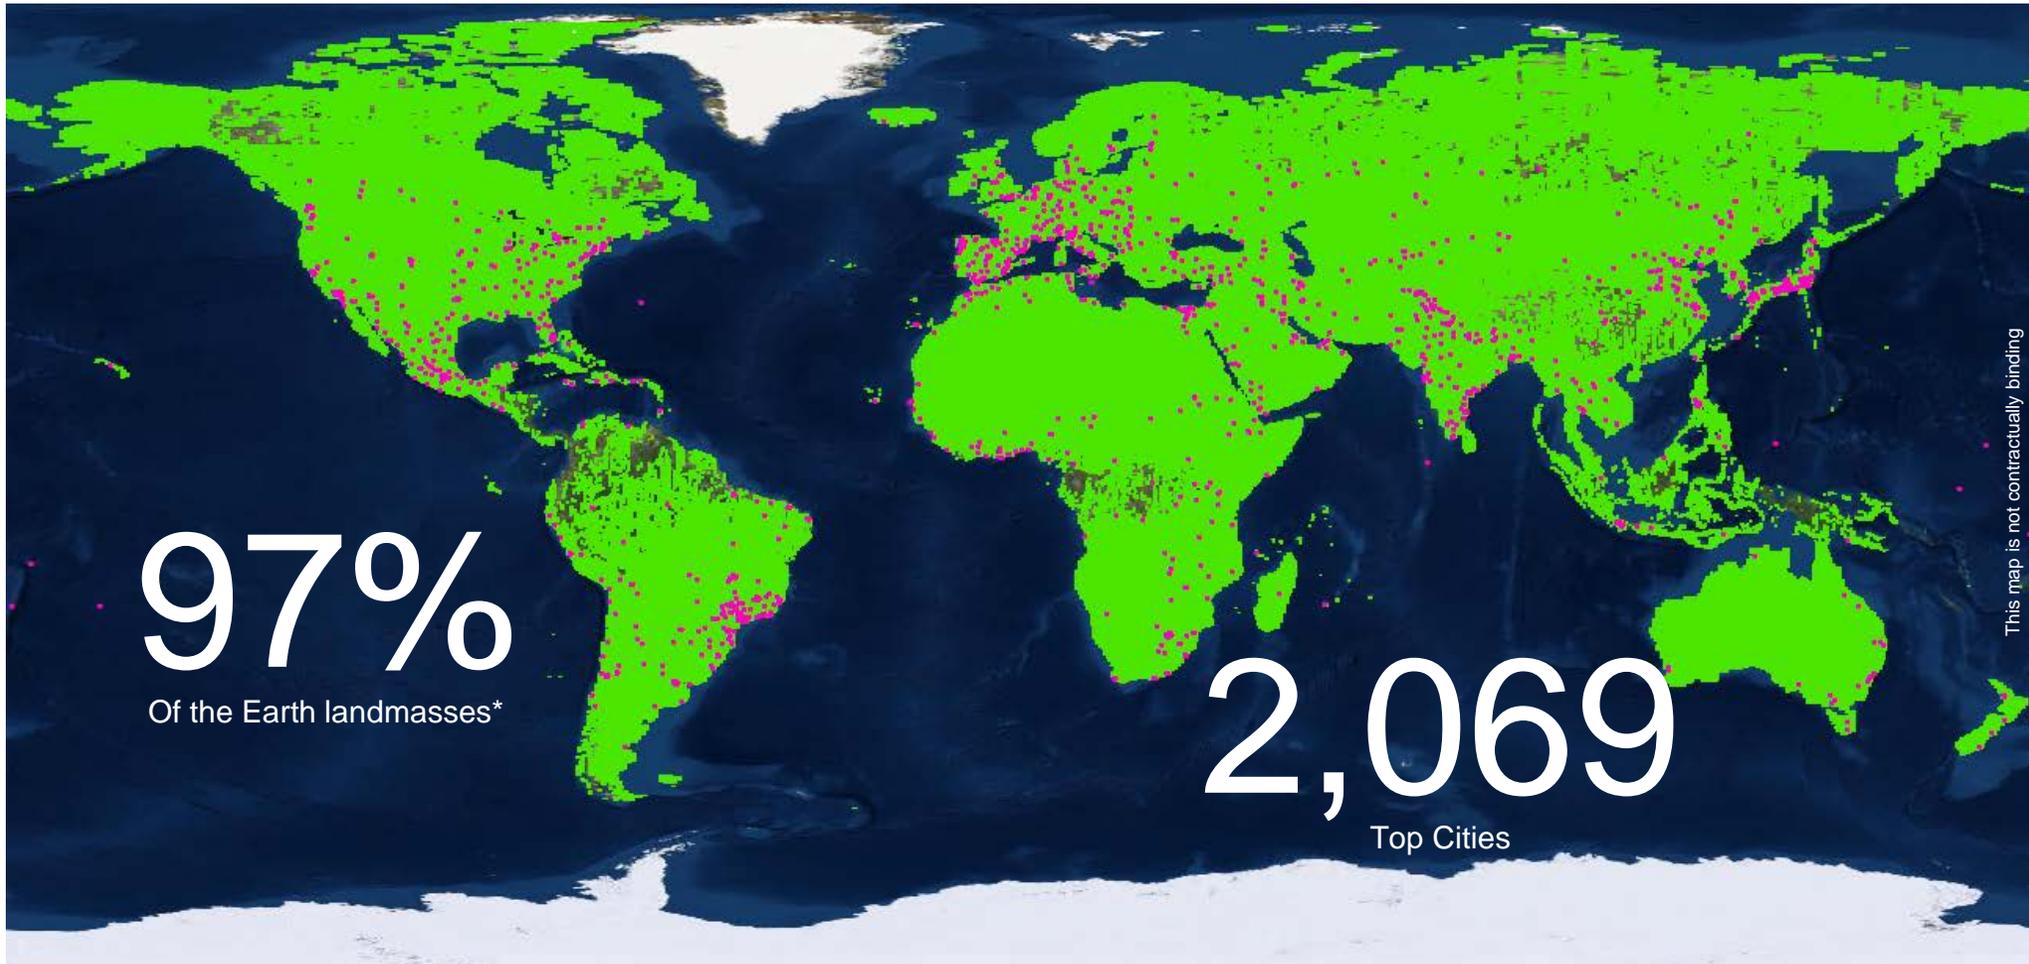

Easy &  
Immediate

Up-to-date &  
Consistent

Affordable &  
cost-effective

# Already Live in One Atlas

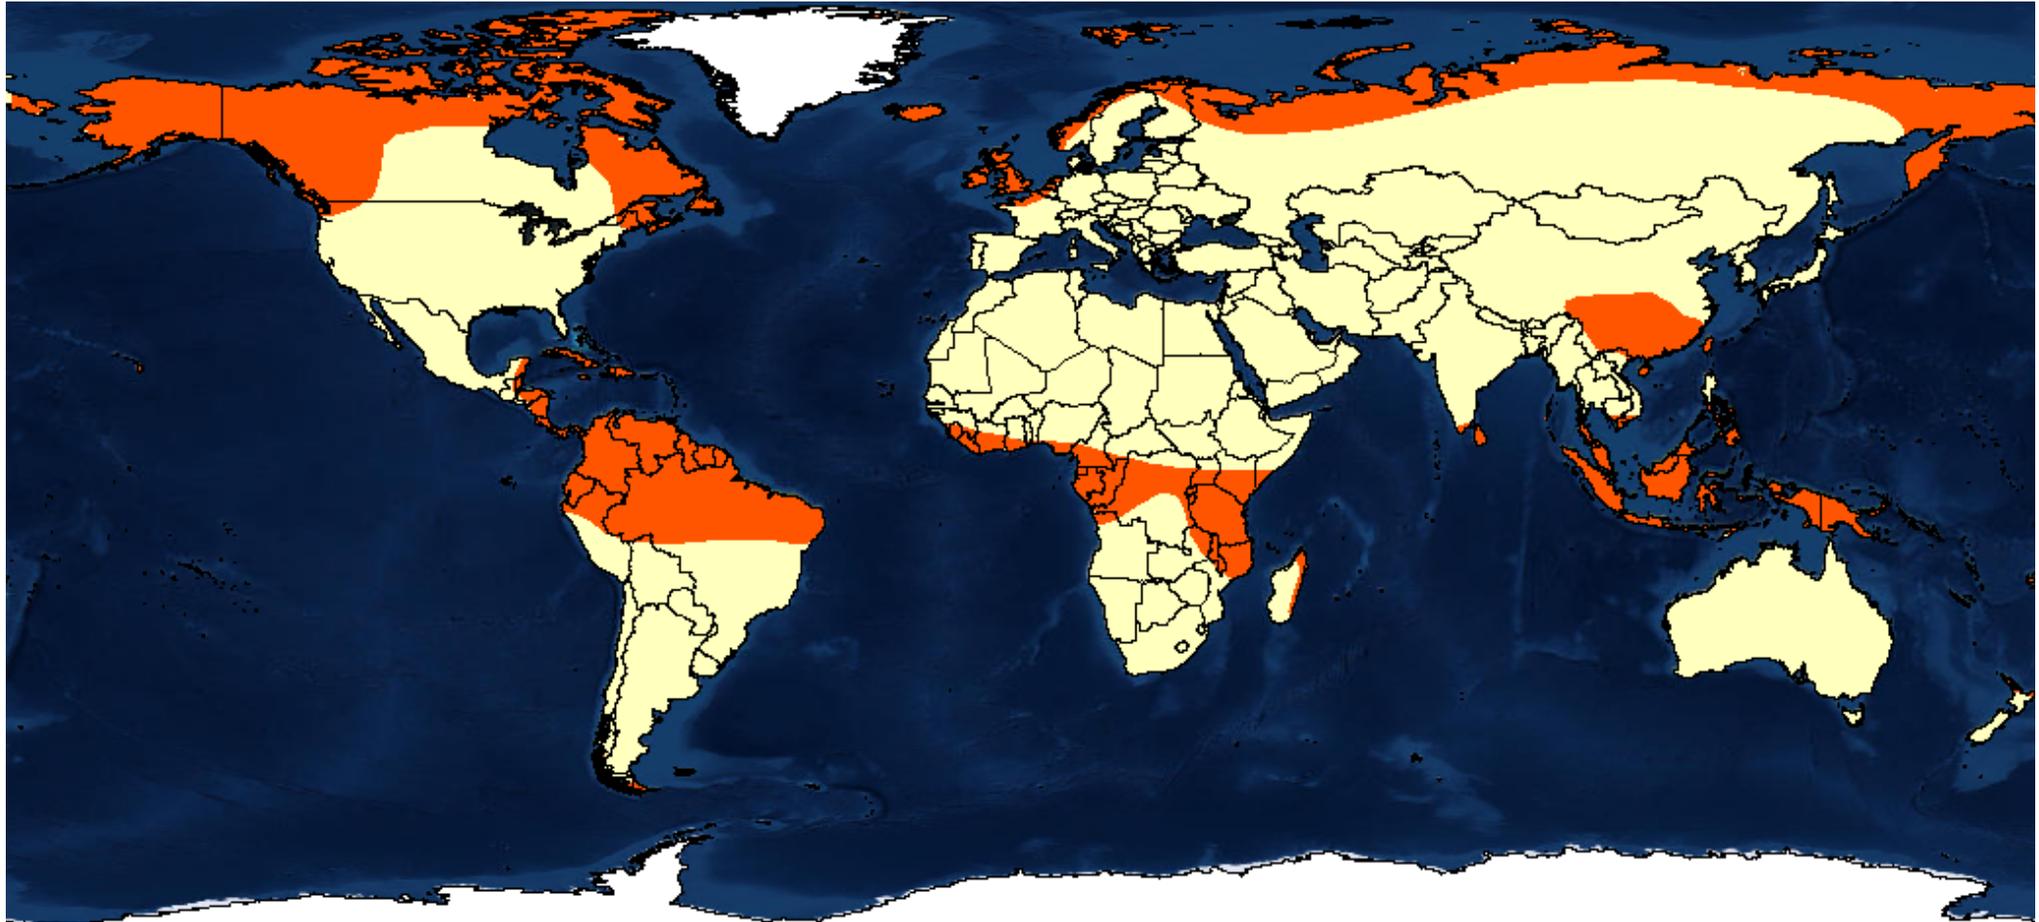

Status: 2016, Sept. 29

One Atlas: 0.5m Imagery  
One Atlas: 1.5m First Layer

\* Polar areas excluded

# One Atlas Commitment

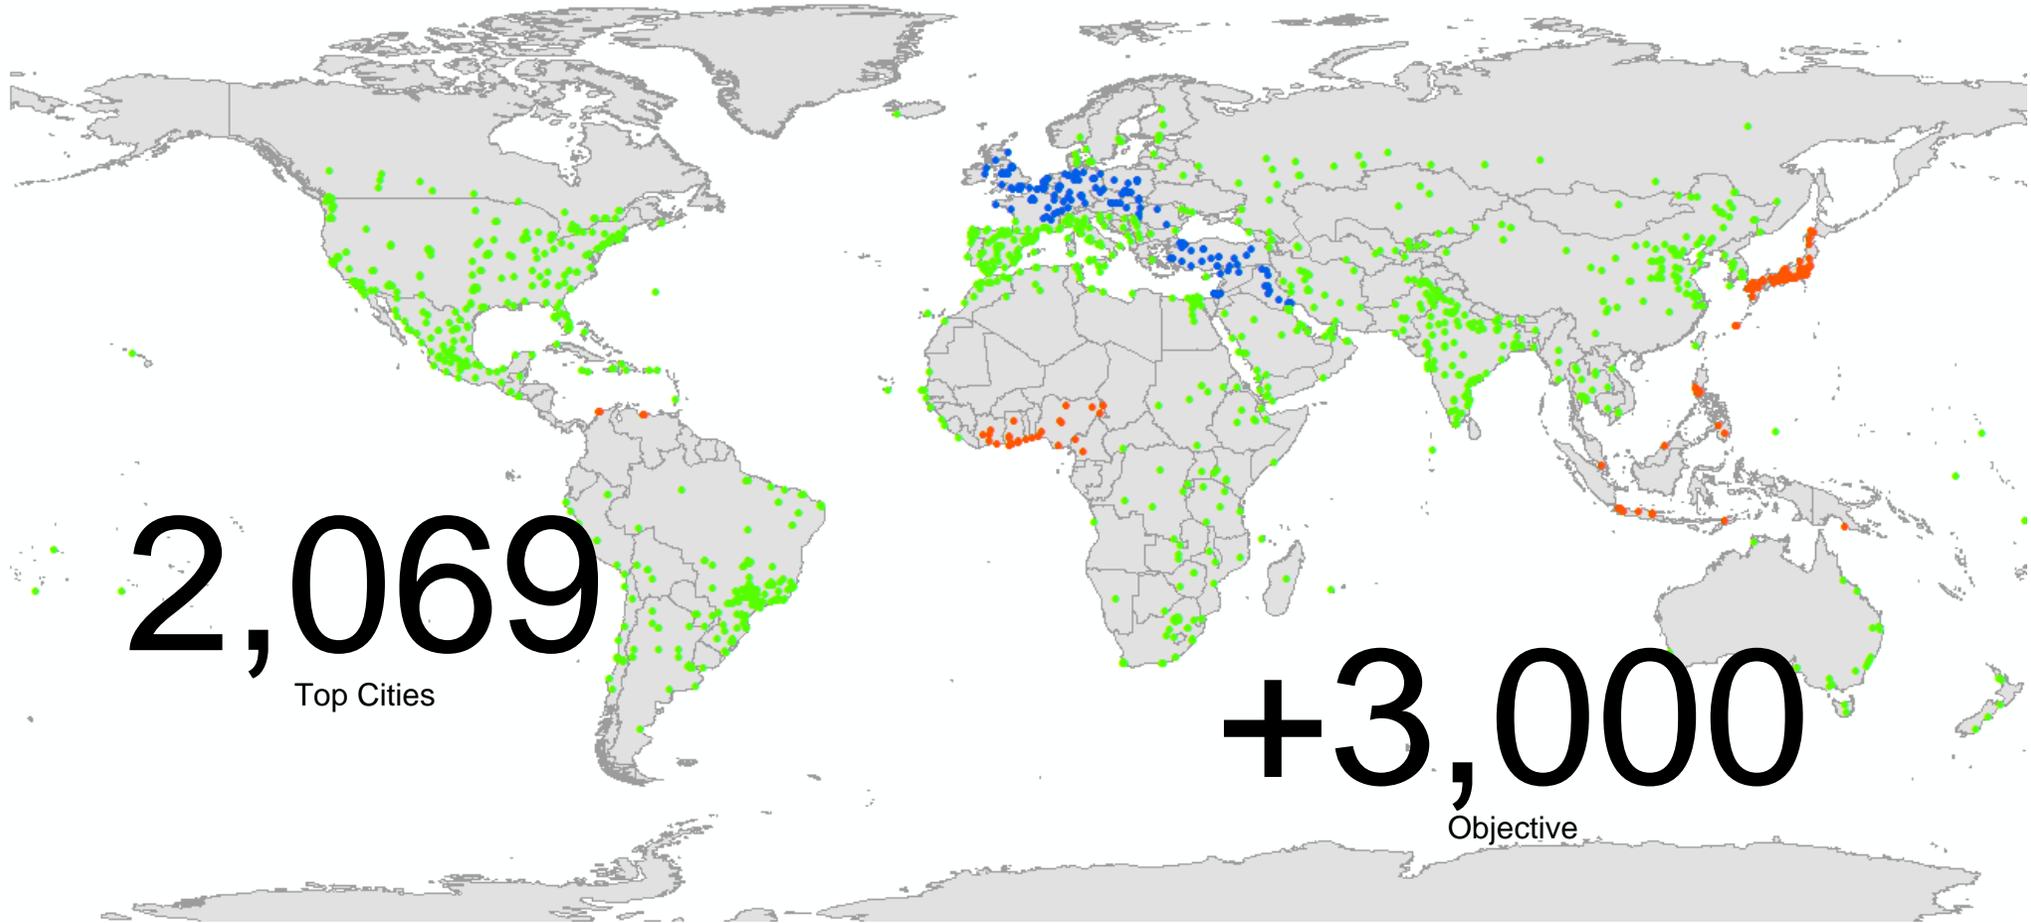

Up to 20° angle - 5% clouds - Less than a year @ 90% confidence

Up to 30° angle and/or up to 25% clouds and/or older than a year @ 75% confidence

# One Atlas Cities Commitment

**2,069**  
Top Cities

**+3,000**  
Objective

-  0.5m Imagery – refresh every year
-  0.5m Imagery – refresh every year (best effort)
-  0.5m Imagery – refresh every two years

# Typical Uses Cases

## Defense and Security

---

- Plan missions and operations
  - Map, report and update positions, movements, risk areas
- Select transportation routes and access points

## Oil, Gas and Mining

---

- Prepare ground scouting / exploration in the field
- Plan / implement a new facility
  - Check environmental site restoration after exploitation

## Civil Engineering

---

- Perform preparatory studies for infrastructure planning
- Define and adjust early routing
  - Visualize, share and communicate infrastructure impacts

## Agriculture

---

- Delineate parcel boundaries
- Map agricultural lands and crop species
- Track and trace tractors and irrigation assets

## Forest, Environment

---

- Assess forest and non-forest area extent
- Identify tree cover change or de/reforestation
- Organize tree count or replanting

## Location Based Services

---

- Widen and refresh imagery database
- Detect quickly where map updates are required
- Locate mobile assets, track and trace them

# 2 Options

## **ONE VIEW**

Cost-effective and  
consistent snapshot

## **ONE LIVE**

Top quality,  
never ageing basemap

# Core Product Options

 **ONE VIEW**

 **ONE LIVE**

Image selection	Handpicked images, driven by cloud minimization and seasonality consistency	
Content refresh	None	Dynamic, as per refresh commitment. Faster refresh option* upon feasibility

# 3 Licenses

## Internal

For those who want imagery to perform their own daily operations

## External Non Commercial

For organizations needing to share the data with others to perform their mission

## External Commercial

For the ones that target to generate / secure revenues thanks to the dataset

# Examples

## Internal

A big O&G company  
A Ministry of Defense

## External Non Commercial

A Ministry of Agriculture  
wishing that farmers digitalize  
theirs parcels on an online  
basemap

## External Commercial

LBS actors for map update  
SMEs selling information  
they extract from the data

# 3 Delivery Options

## Streaming

WMS, WMTS, WFS  
<1s for one TMS tile  
(256x256 px.)

## Digital Copy Tiles

Global Ortho Layer Tiles  
(256 x 256 px,  
mixed PNG and JPEG)

## Digital Copy Segments

Individual Orthoimages  
JPEG 2000 Optimized

# Delivery Options
